

Kiddie Kampus

CONNECT & COMMUNICATE

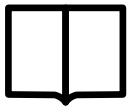

We want to connect with parents and guardians to further engage classroom experiences! It's also important to efficiently communicate important updates: closings, delays, safety concerns and more. We communicate through email, Facebook, Instagram, and a new app known as **SeeSaw**, which will serve as our "go-to" method of communication.

Journals

Inbox

Journal

Think of this as your child's news feed. This will feature posts about your child's activities in the classroom to show what he or she is learning. Posts to your child's Journal can be visible to only you or to any family registered for your child's class on SeeSaw.

Inbox

This is your message portal. Receive all-class announcements or participate in individual message threads with the teachers. This in-app feature can also be synced to regular SMS texting so you don't miss an alert.

MEDIA RELEASE INFO: Kiddie Kampus has established a solid community following on Facebook and Instagram, where many parents and families enjoy seeing the regular class activities and postings. We also strive to honor the privacy requested by any family that does not allow permission for public posts through the media release statement. In these such cases, we will provide postings through SeeSaw where Kiddie Kampus has its own private network available ONLY to students enrolled for the current school year.

Please acknowledge your Media Release preferences during registration.
